***Response to Arguments***

1. Applicant's arguments filed on June 30, 2004 have been fully considered and subsequently found persuasive.

***Allowable Subject Matter***

2. **Claims 1 – 7 are allowed.** The following is an examiner's statement of reasons for allowance:

Regarding to the claimed invention, the prior art of record fails to show or render obvious of a communication terminal apparatus and radio reception method capable of performing path selection accurately with high reliability even in the case where a base station performs directional controlled transmission. In forward transmission directional control is applied using a smart antenna and adaptive array antenna to provide preliminary selection means for selecting a path candidate at a reception timing of one channel, a communication terminal performs correlation calculation between a delay profile of a dedicated physical channel and a delay profile of a common control channel, a switch that switches between the searching paths, and thereby performs path selection accurately with high reliability to determine a timing reception of path.
